

TO WHOM IT MAY CONCERN

Hazardous materials

Paragraph 3, GefStoffV

Ladies and Gentlemen

We have carried out our risk assessment according to paragraph 6.

We state that our company does not use any hazardous materials for any of our products.

Ever since we were founded in 1986, we have only used environmentally friendly technical materials, which are also antibacterial and flame retardant.

A "safety data sheet" is therefore unnecessary.

You are cordially invited to view our «Product Catalogue» on the first page of our website www.samarit.com. These products are assigned to Class I according to MDR and registered with EUDAMED.

Kind regards,

SAMARIT MEDICAL AG

Jürg O. Schuster
Managing Director / CEO
