

Disposable Covers for Samarit Rollbord

INSTRUCTION FOR USE

1. Dispo Covers are sold in a solid box which holds four rolls. Each roll has a length of 100 meters (3940 inch) and is perforated all 2 meters (79 inch)
2. Place the roll in the dispenser or place it on a appropriate shelf.
3. Unroll the material in a length of 2 m and take the first length at the perforation.
4. Enter the 'Rollboard' into the tubular cover (60 cm/24 inches wide, 200 cm/79 inches long)
5. Pull the Dispo Cover over the 'Rollboard' tight on one side and fold the overlapping material on your side over the top of the Dispo cover.
6. Press the air out from the overlap, middle to the left and right. This way the cover is tight on the Rollboard.
7. Press the air out from the overlap, middle to left and right. This way the cover is tight on the Rollboard.
8. Transfer the patient according to the instructions.
9. To take of the PE-Cover, you can pull the Rollboard out (2 person) or you pull one side over the other this way you keep the dirt inside and dispose the used cover.
10. Clean the used 'Rollboard' with the Ecolab Incidine Oxywipes S or similar disinfection wipes.
11. Control that the 'Rollboard' has no damages and keep if ready for next use.
12. In case you find a problem take two pictures (one from near, one from far to see the whole product) and ask for assistance.
